

HEBOFIX base for EGT- profiles

PRODUCT DESCRIPTION

The base for hook-and-loop fasteners with clamping foot serves as a gentle installation support of lines, cables and hoses on aluminium profiles.

The clamping foot can be assembled by pushing into a boring. After that the base can be assembled with our hook-and-loop tape in variable length.

ADVANTAGES

- // simple mounting without tools into popular aluminium profiles
- // variable length of the hook-and-loop tape, or already equipped with hook-and-loop tape
- // provides a tangle-free and protective cable installation

- // reusable
- // cable bundles can be extended easily
- // easy handling
- // reduced risk of injuries compared to use of cut off cable ties

TECHNICAL DATA

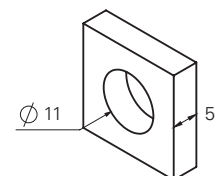

Material: polyamide, reinforced with glass fibre, self-extinguishing according to UL94-V0

ACCESSORIES

- // hook-and-loop tape on reel

HEBOFIX BASE FOR EGT-PROFILE WITH 11 MM-BORING
